Shining Bright: The Future of India's Jewellery Industry

Indian Domestic Jewellery Market Size – by Value (USD billion)

- By FY 2028, the Indian jewellery retail market is set to touch USD 145 billion, driven by macroeconomic tailwinds and a rise in disposable incomes.
- A strong cultural affinity for gold, along with growing traction in alternative categories like gemstone and fashion jewellery, is accelerating consumer demand and market diversification.

Breakup of Jewellery Market by Usage – By Value

- Manufacturers are strategically focusing on producing lightweight pieces to cater to the preferences of younger consumers, particularly those seeking daily wear gold jewellery that complements western-style attire.
- With over 65% of India's population under 35 and more than 308 million women aged 20–49, this demographic demands jewellery that emphasizes quality, authenticity, and purity—creating a significant opportunity for premium yet accessible offerings.

Glittering Prospects: Exploring Investment in India's Jewellery Market

The market size of the organized sector is projected to grow from USD 19.2 billion in FY 2020 to USD 82.65 billion by FY 2028, reflecting a CAGR of 20%

Indian jewellery consumers are becoming increasingly discerning and brand conscious by seeking assurance of the final product's quality and transparency in their jewellery purchases which can only be provided by organized retailers

Organized jewellery retailing today represents a wide range of ready-made ornaments, offering various designs and options

National and regional jewellery retailers, with their bigger scale, can tailor designs to regional preferences and global trends
